

Read complete description of the module in the file `app\code\Extait\{module name}\README.md`

Installation steps:

1. Unzip the archive into a tempo directory.
2. Copy 'app' folder to the project root folder.
3. Install the module in one of the following ways:
 - a) Use 'Web Setup Wizard' in the admin panel:
 - SYSTEM -> Web Setup Wizard -> Module Manager
 - Select a necessary module and install it.
 - This installation method requires cron to be enabled.
 - b) Execute following commands in developers console:
 - `php bin/magento module:enable Extait_{module name}`
 - `php bin/magento setup:upgrade`
 - `php bin/magento setup:di:compile`
 - `php bin/magento setup:static-content:deploy`
