M2: Google reCAPTCHA V2

User Guide

Table of Contents

INTRODUCTION

The extension lets protect web stores from bots and fraud attacks on 5 forms: Registration, Login, Forgot Password, Account Edit, Contact Us Forms.

The unique option is front-end validation. The advantage of front-end validation is to check whether the customer put a checkmark 'I am not a robot' without reload, that saves customers' time, and shows the error immediately.
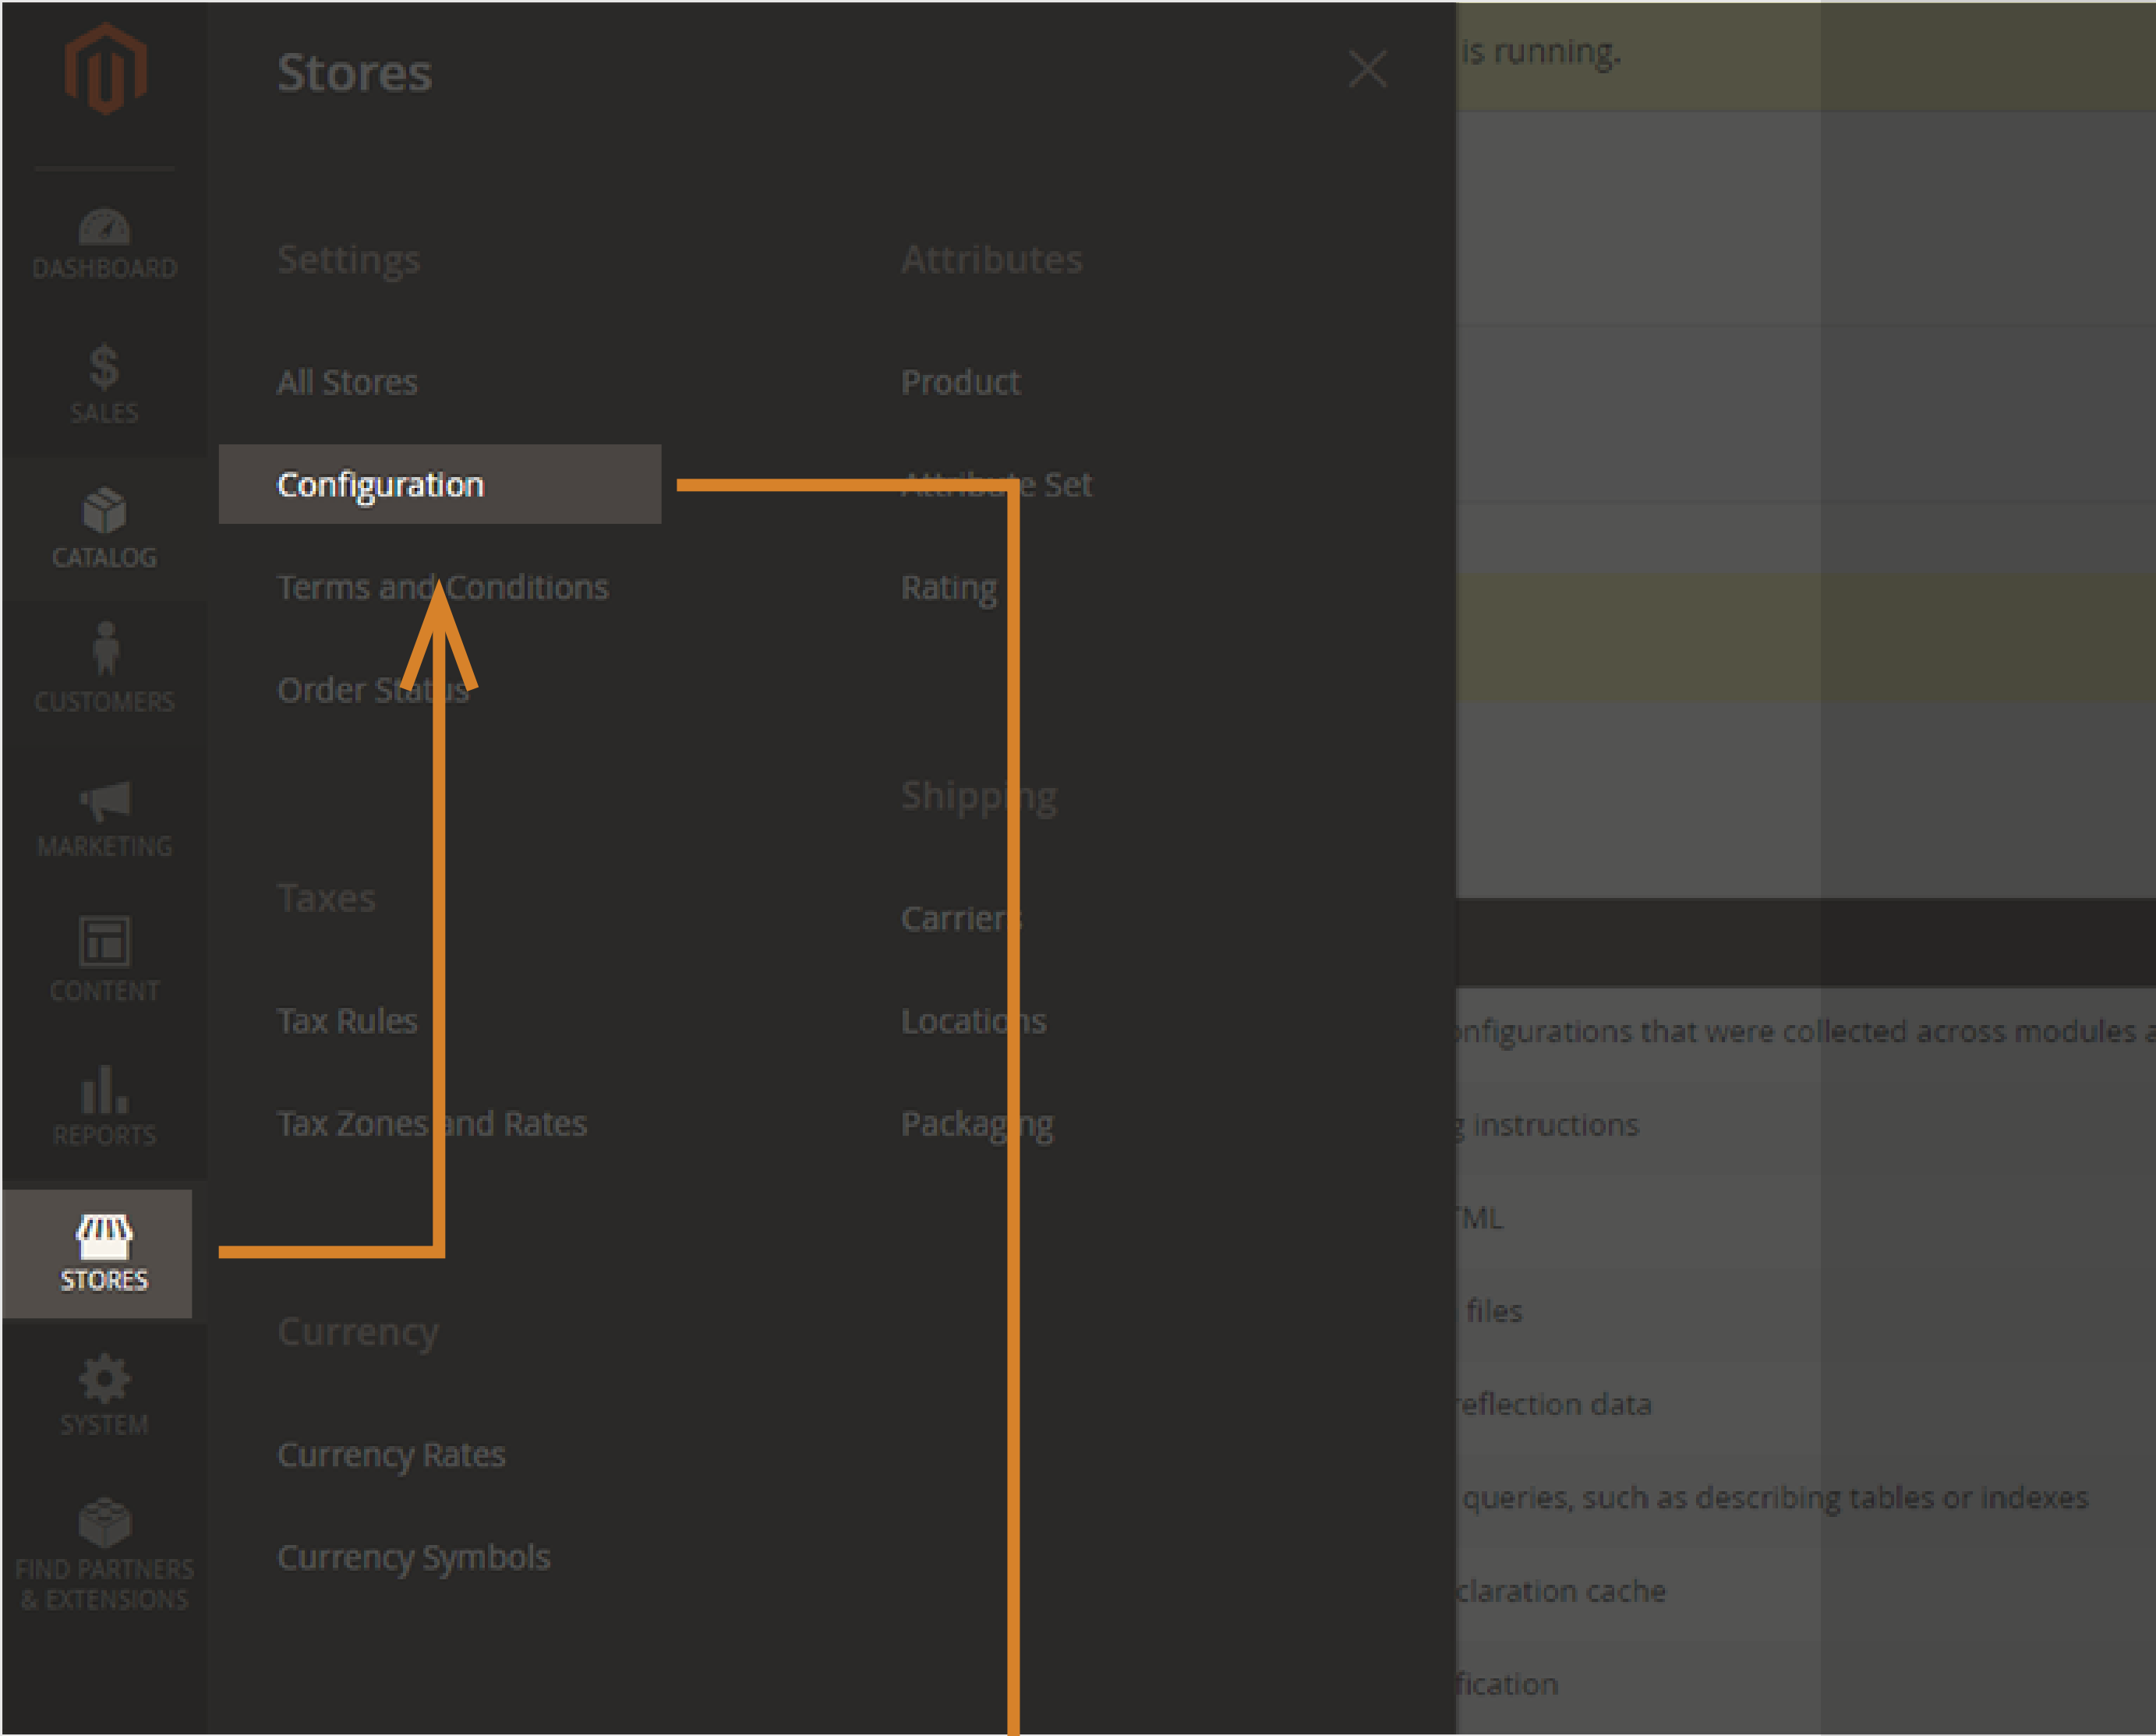

Main Features:

- Apply reCAPTCHA to five forms. The extension allows applying Google reCAPTCHA v2 to the following forms: Registration, Login, Forgot Password, Account Edit, Contact Us forms.
- Choose reCAPTCHA theme. Select between dark and light themes of reCAPTCHA widget on your store.
- Set reCAPTCHA size. Select a normal or compact size of reCAPTCHA widget on your store.
- Language settings. The language of reCaptcha widget is set automatically according to the location settings.

SETTINGS

Google reCAPTCHA is compatible with Magento CAPTCHA. If Magento CAPTCHA is enabled, they are displayed together.

How to Add ReCaptcha to Custom Forms

In order to add the Google reCAPTCHA V2 on a custom form follow next steps:

1. Add your custom form to the 'Display on Forms' list in configuration of the module to configure display.
2. Add the reCAPTCHA widget to form layout to display and validate the reCAPTCHA on front-end.
3. Create own observer to validate the reCAPTCHA on back-end.

Read detailed description in 'ReadMe' file.
